We care for you

## Report

### 1. What is MediPres

MediPres is a Web application that will help you take a call on what medicine best suits your needs.

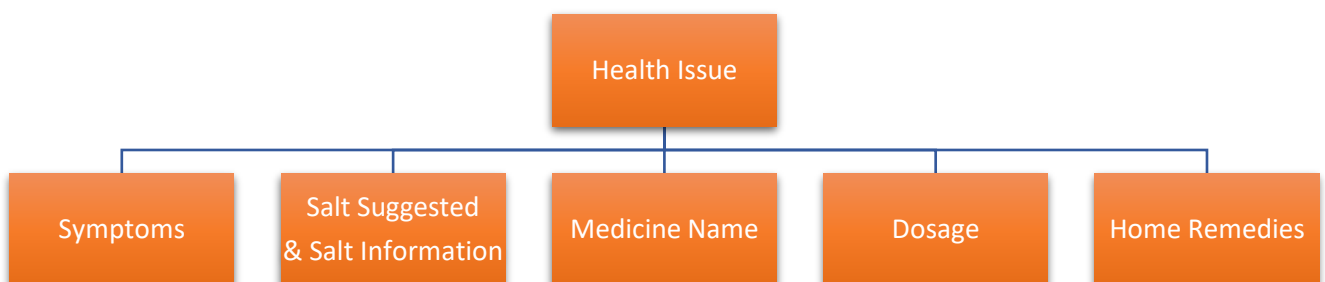

It is a smart initiative which gives you suggestions regarding basic medication by simply stating conspicuous symptoms.

### 2. How MediPres Work?

Let's consider the case of a fever and you don't quite recall the name of the medicine required but you're quite sure the drug is OTC (Over the counter).

You can simply search on our application; we will provide a list of OTC drugs with dosage guidance which are relatively harmless since they do not require a prescription.

### 3. Feature of MediPres

- **Medical Prescription**

MediPres provide detailed guidance of health issues experienced by you

If you experience some issue you can refer our symptoms section so that you can be assured and can further take steps accordingly with the help of our guidance

Our Application also suggest Medicine salt as per health issue diagnosed by you referring to symptoms section and also provide detail of salts also so that you can take medicine as per suggested salt

Our Application Provide List of medicine available all across india so that you can get medicine with suggested chemical composition regardless of Medicine Name given by different pharmaceutical company.

MediPres also provide Dosage guidance as per different age group so that you take medicine as per required amount to avoid any side effects.

MediPres also provide Home Remedies Guidance if a user doesn't want to take medicine and want to recover by ayurvedic or traditional technique.

- **First Aid Guidance**

MediPres also provide our user how to tackle during emergency condition with detailed guidance like burn, stroke, drowning etc.

We have also provided list of Helpline Number available across India.

- **Health Related Tips**

We at MediPres care for our user, so we also provide Health related Tips so that we can educate our user about Healthy Lifestyle.
